“Flares Energy LLP” aka “Flares Solar PV Systems” is a prominent provider of solar energy solutions, recognized for delivering comprehensive Engineering, Procurement, and Construction (EPC) services. The company was founded in January 2018, following over seven years of in-depth research and practical experience in the Solar Renewable Energy sector, during which the team successfully installed more than 10 MW of Rooftop Solar PV Systems.

The company began its journey in the rural region of Rahata in Maharashtra. From these humble beginnings, Flares Solar PV Systems has expanded its reach across the entire state, establishing a strong social presence in major cities such as Pune, Nashik, Solapur, Ahmednagar, and Baramati. This expansion is supported by a growing team of over 120 skilled professionals.

Flares Solar PV Systems excels in various sectors of the solar industry, including:

Solar Installation Services:

Offering end-to-end installation solutions for solar PV systems.

After Sales Service:

Providing comprehensive support and maintenance after the initial installation to ensure optimal performance.

Remote Monitoring:

Implementing advanced technologies to monitor solar systems remotely, ensuring efficiency and timely maintenance.

Project Management:

Overseeing all aspects of solar projects, from initial planning to final execution, ensuring timely and budget-friendly completion.

Documentation for MSEDCCL or Finance:

Handling all necessary documentation for regulatory compliance and financial approvals, streamlining the process for clients.

Annual Maintenance:

Offering regular maintenance services to sustain the efficiency and longevity of solar installations.

The company's ethos aligns with the visionary principles of Mr. Ratan Tata, emphasizing innovation, quality, and sustainability. Despite being a startup, Flares Solar PV Systems has distinguished itself by completing 100 projects within just three years, a remarkable achievement in the industry.

Moreover, the company is a pioneer in incorporating advanced technologies, being the first in the solar sector to offer 3D designs for green energy solutions. This innovation enhances the precision and efficiency of solar installations.

In recognition of its outstanding performance and commitment to quality, Flares Solar PV Systems was awarded a TATA Franchisee for the state of Maharashtra in August 2021. This prestigious affiliation underscores the company's dedication to excellence and its prominent position in the solar energy market.

Vision

In the next two years, our goal is to create job opportunities for over 500 individuals in rural areas and to implement more than 5,000 projects.

Mission

“Our mission is to deliver high-quality, cost-effective solar EPC services that meet the energy needs of our clients while fostering environmental sustainability and community development. We strive to exceed customer expectations through innovation, integrity, and excellence in every project we undertake.”

Why Choose Flares?

✓ Government Licensed Electrical Company

MEDA Registered Firm, National Portal and Electrical Contractor License Holder

✓ Highest Returns on the Investment

You may get a Solar Project Cost same or lower from different solar vendors in India. But to make use of what item for what purpose is our skill. We tend to give higher output than those others offer, by making technical changes in the system. So that money invested recovers at faster rates.

✓ In house team for everything related to Solar

Designs, Electricity Board Approvals, Installation, After Sales Support, Troubleshooting. You ask we have

✓ Tracking & Reporting

We don't only install solar system and leave up to you for its maintenance, we track your daily generation from Solar System and if any problem alarm you.

✓ AI based Monitoring

AI-driven monitoring enhances efficiency, accuracy, and automation in various industries.

✓ Highest Safety Standards

"Tomorrow's tech, wellness, education, sustainability, exploration, art."

✓ Best Finance Options

We have tied-up with almost all the banks that provide Loans for Solar Projects.
- Zero Security, i.e. without Collateral Lowest Processing Fess, Flexible Down payment, , Without Investment, PPA

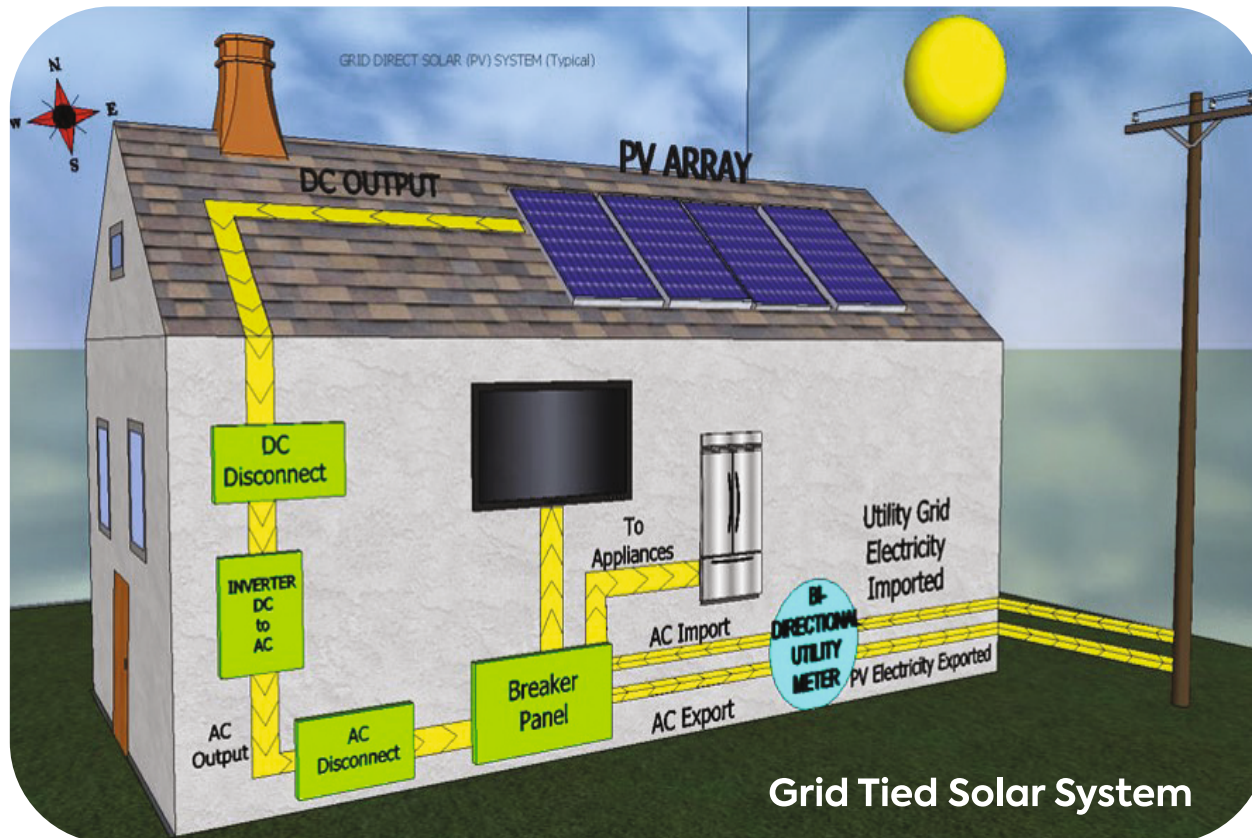

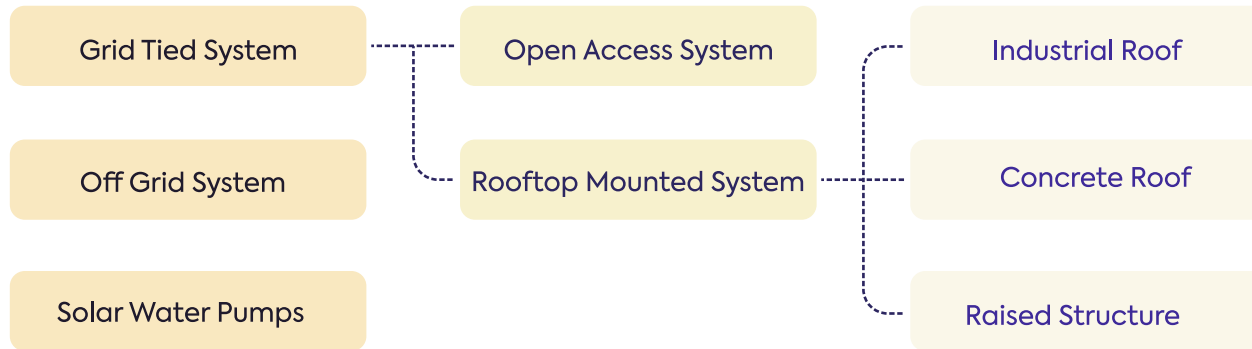

✓ Lifetime O&M

We install System in such a way that anyone can do its service & maintenance.

✓ World Class Design and Engineering

World-class design and engineering exemplify top-tier innovation and precision worldwide.

Our Offerings

Benefits

-  Reduces the dependency on grid power.
-  Long term (about 25 yrs) reliable power source.
-  The initial investment cost gets recovered within 3-4 years.
-  Income Tax benefits (Accelerated Depreciation).

Finance Options

- ✓ Capital Expenditure (CAPEX)
- ✓ Operational Expenditure (OPEX)
- ✓ Power Purchase Agreement (PPA)
